Skills

- **Languages**: Python, SQL, R, Bash, C#, JavaScript/TypeScript, Node
- **Databases/Data warehouses**: PostgreSQL, MySQL, Snowflake, MongoDB, Google Firebase, Google BigQuery
- **Data Engineering**: Airflow, dbt, Superblocks , ETL/ELT, Workflow Orchestration, Data Orchestration
- **Cloud Services**: AWS, GCP, Azure
- **Tooling**: Jupyter Notebooks, R/Rstudio, Grafana, Datadog, Git, Linux

Experience

Manufacturo, Solutions Consultant, *May 2025 – Present*

- Led the migration of over 20,000 issue tickets from Snowflake into Azure by architecting a data intake/ingestion process, leveraging Python/Bash migration tooling, and auditable data validation processes to ensure continuity and integrity during MES platform transitions.
- Designed and optimized SQL-based operational analytics and reporting pipelines on MS SQL Server supporting manufacturing traceability, inventory visibility, and recursive as-built genealogy analysis across large manufacturing datasets.
- Replaced ad hoc spreadsheet-based migration workflows with automated Python/R transformation and validation pipelines, improving auditability, reproducibility, and data quality across enterprise MES migration processes.
- Created formal proposals to improve migration architecture and operational processes, including VM-based execution environments, pipeline-oriented migration workflows.

Analytics Engineer, Democratic National Committee, *May 2024 – November 2024*

- Created and orchestrated ELT pipelines in dbt and Airflow to transform campaign data within BigQuery cloud warehouse environments for downstream analytics and reporting.
- Diagnosed and resolved data freshness and deduplication issues across a campaign-wide event signup pipeline spanning 100+ dbt models and tens of millions of records, improving the accuracy of analytics consumed by DNC leadership and public-facing reporting initiatives.
- Traced lineage across Airflow and dbt workflows to identify orchestration cadence mismatches and incorrect record-selection logic, ensuring downstream datasets reflected the most current volunteer demographic and geolocation data.
- Scraped county websites to obtain real-time precinct-level vote counts for election-night reporting pipelines and operational analytics.

Data Engineer Consultant, UC Merced, *July 2024 – October 2024*

- Trained a team of researchers in implementing better code hygiene geared towards research, resulting in improved reproducibility.
- Lowered the time of the data ingestion step by over 89% by caching results and performing bulk operations when hitting the OpenAlex API.
- Performed exploratory analysis and data validations using R and Jupyter notebooks
- Developed an automated NLP-based summarization workflow in Python, reducing manual review across large collections of academic papers.

Data Engineer Consultant, Politarian, *November 2023 – May 2024*

- Optimized web-scraper performance by caching results requiring expensive computation, decreasing serverless function runtime by 18%.
- Configured AWS EventBridge Scheduler and serverless functions to run jobs on a schedule, freeing client from having to run scripts manually.
- Implemented logging and exception handling, improving observability across different stages of the scraping process.

Data & Analytics Manager, LA Promise Fund, *March 2020 – May 2024*

- Automated data ingestion and reconciliation workflows, ingesting raw academic data from LAUSD spanning millions of records.
- Delivered mission-critical academic reports for the National School Improvement Program, providing insight into student academic performance for several principals across the Slate-Z/South Los Angeles region.
- Negotiated the renewal of the MOU with LAUSD by outlining a clear mission and delivery timetable of data products to stakeholders
- Extended our Student Information Systems by authoring custom plugins in SQL and NodeJS, rapidly accelerating data delivery to key vendors.

Education

University of California, Los Angeles
Bachelor of Arts, Political Science & Economics**,** June 2017

Antelope Valley College
Associates Degree, Liberal Arts and Sciences II**,** June 2013
